OPEN RANK POSITION IN MECHANICAL ENGINEERING

The University of Texas at San Antonio has embarked on a cluster-hiring in the area of Human Performance to establish research and educational excellence focused on improving human performance for health, elite sport, and military applications. The Human Performance Initiative (HPI) is a collaboration between the Klesse College of Engineering and Integrated Design and The College for Health, Community and Policy.

ESSENTIAL FUNCTION
The successful candidate is expected to demonstrate a record of high-quality research, scholarship, external funding capabilities, excellence in undergraduate and graduate education or evidence of the ability to teach, and a commitment to inclusion and diversity. Expertise in all areas of human performance research will be considered.

REQUIRED QUALIFICATIONS
The required qualifications of a successful candidate are a doctorate degree in a related field, outstanding research, teaching and funding record appropriate for appointment at the desired rank (for those seeking appointments with tenure, this is contingent upon the UT Board of Regents’ approval) and demonstrated commitment to inclusion and diversity. Moreover, the successful candidate must demonstrate their ability to work with and be sensitive to the educational needs of diverse urban populations and support the University’s commitment to thrive as a Hispanic Serving Institution and a model for student success.

HOW TO APPLY
Please submit all documents in a single PDF:
1) A Curriculum Vitae
2) A research and teaching statement, which includes a discussion on the role diversity and inclusion play in an academic environment (4 page limit)
3) Complete contact information for at least three professional references

Applications received after October 30, 2022 will be accepted and reviewed until the position is filled. Incomplete applications will not be reviewed.
